FINAL YEAR PROJECT

Brain Tumor Detection and Classification

- * Tools/Technologies Used: CNN (Convolutional Neural Network), DNN (Deep Neural Network), Python.
- * Description: Developed a model for the automatic detection and classification of brain tumors using advanced deep learning techniques (CNN and DNN).

* This project demonstrates practical application of core Data Science/AI skills.

INTERNSHIP

- Python Full Stack Intern
- I just completed Deloitte Australia's Data Analytics on Forage. In the simulation I:

Completed a Deloitte job simulation involving data analysis and forensic technology

Created a data dashboard using Tableau

Used Excel to classify data and draw business conclusions

- AWS APAC Solutions Architecture virtual experience program on Forage - December 2025

Designed a simple and scalable hosting architecture based on Elastic Beanstalk for a client experiencing significant growth and slow response times.

Described my proposed architecture in plain language ensuring my client understood how it works and how costs will be calculated for it.

STRENGTHS

- Quick learner, hard worker, self-motivated, Optimistic.
